

Computer Engineering student with a strong interest in cloud computing and AWS. Hands-on experience deploying web applications on AWS and building projects using Python, HTML, CSS, and JavaScript. Eager to apply my technical skills, learn from industry professionals, and contribute to cloud-based solutions through a Cloud Computing Internship.

Education	
Completed Diploma in Information Technology Government Polytechnic Mumbai (2021-24)	Currently Pursuing B.E Electronics and Computer Science (2024-27) Anjuman-I-Islam's Kalsekar Technical Campus

Projects	
<u>WanderNest – AWS EC2 & Nginx Deployment</u> Developed and deployed a responsive travel website using HTML, CSS, and JavaScript on an AWS EC2 Linux instance. Configured Nginx as the web server to serve website assets and implemented interactive JavaScript navigation. Used SSH and SCP for secure server administration and file deployment, and configured the EC2 environment for public access.	<u>Cloud Portfolio Website Deployment using AWS S3</u> Designed and developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase projects, skills, and certifications. Deployed the website using Amazon S3 Static Website Hosting, gaining hands-on experience in cloud deployment and web hosting. Configured S3 bucket policies and public access settings for website hosting, and managed the source code using Git and GitHub, making the portfolio accessible through both GitHub Pages and AWS S3.
<u>Python-Based Keystroke Logging System (Educational Project)</u> Developed a Python-based keystroke logging application as an educational project to understand keyboard event handling, file operations, and system-level programming. Built an advanced version capable of securely transmitting recorded data via email to demonstrate automation concepts and gain insight into cybersecurity techniques and defensive security awareness.	<u>Fake News Detector</u> I Built a Fake News Detection system using Python, Pandas, ML, and NLP, leveraging an existing dataset and integrating it into a user interface where users can input news text from the dataset to receive real-time fake/true classification.

Technical Skills	Certifications
- Cloud: AWS (S3, EC2, CloudFront) - Programming: Python, JavaScript - Web: HTML5, CSS3, Bootstrap - Tools: Git, GitHub - Concepts: Cloud Computing	blob:https://skillbuilder.aws/44aec98f-bc1a-4cd1-93d4-e9c67b80332b - AWS Cloud Practitioner Badge – Credly - Python NPTEL - Bootstrap Workshop
